

Sample Client-Patient Letter to MP

Dear Member of Parliament Leah Taylor Roy,

August 18, 2023

This is the first letter I've ever sent to an MP and I really don't know where to start. It is unfathomable how the government can sneak something unrelated (sections 500-504) into an existing bill (C47) and even more so, why they are enforcing control over natural supplements.

I've had the same MD for over 20 years. The only time she sees me is for an annual checkup or if I get myself into trouble (ie. concussion). She knows that if I book an appt, it's serious. The reason for infrequent visits, is that I take supplements regularly at the guidance of my Registered Orthomolecular Health Practitioner (ROHP). This keeps me healthy, allows me to recover when I get run down or catch a cold and most importantly - I don't burden the health care system with curable ailments.

Furthermore, did you know one cannot rely on product labels to treat themselves? When I had a cold, I was given a protocol which included vitamin c. The bottle says take 1 a day. My experienced practitioner taught me how the body will use and need more vitamin c (as well as other immune support) when fighting an illness. I would not have recovered on 1 capsule (of Vit C) a day, had I relied solely on the product label.

Vitamins and supplements have been around for a long time, and they have been proven to be free of risks, unlike pharmaceuticals. Hence, there is no reason to treat them the same.

Even if you've never taken a supplement, I urge you to use your critical thinking to deduce how a natural substance is a risk and subject to this type of government overreach.

Please read the enclosed material and move to repeal sections 500-504 of Bill C47. I look forward to your personalized response and views.

Respectfully,
AB
